

## Research and Development Chemist -Personal Care

- **Location:** Alpharetta, GA

### Job Details

We currently have a position available in our new Technology Center in Alpharetta GA for a Research and Development Chemist with background in the Personal Care / cosmetic ingredients business.

### Major Position Responsibilities

- Research and development as well as technical support to customers in the Personal Care business.
- Organizing and carrying out day-to-day project plans for product development work and coordinating any analytical work needed to progress projects.
  - Primary focus of the position is the development of antimicrobial ingredients and development of new coated particles for Personal Care formulations. This involves a substantial amount of formulation work and everything that is involved in developing a product and preparing the data and documentation for launching that product.
  - Direct customer contact in answering customers' questions about product specifications, formulation issues and analysis problems.

### Requirements

A BS or MS in chemistry, and a minimum of three years Product Development / formulation experience, preferably in the Personal Care area. The right candidate will have good communication, organizational and interpersonal skills and a willingness to learn and master new techniques.

### Additional Information/Special Skills

This position requires a good practical understanding of Chemistry with the ability to apply this to real world analytical and formulation problems. The position will be involved in a wide range of activities and the ability develop new skills as needed is a must. Prior experience in techniques such as particle size analysis, color analysis, enzyme assays, spray drying, fluid bed operation, bench top milling, are desirable. Background in and experience with preservatives and skin penetration studies desirable.
