

## Senior Scientist – International Formulation – Sun Care R&D

Located in our Ormond Beach, FL OTC manufacturing facility, the primary Purpose of this position is to actively participate in the development of formulas, processes, and technologies by applying scientific knowledge and consumer research to new and / or improved products in accordance with Playtex business unit objectives, for the International Markets.

### **Essential Functions:**

- Design and carry-out experiments, interpret data, and document data and conclusions, with minimal supervision.
- Prepare and present technical information and presentations on project developments, verbally and in writing.
- Work with Consumer Research group to proactively integrate consumer understanding into the product development process.

### **Experience/Education Required:**

- B.S. degree in Chemistry or Chemical Engineering with 8 - 10 years skin care / emulsion experience, or
- M.S. degree in Chemistry or Chemical Engineering with 6 - 8 years skin care / emulsion experience, ideally within a consumer products environment.
- Experience with international sun care formulations is a plus.
