

Regulatory Specialist

Skincare manufacturer located in the DFW area is seeking a fulltime Regulatory Specialist with 2 to 5 years experience minimum with OTC products. This person must have a good foundation in laboratory testing methodologies as FDA investigator (preferred) and/or regulatory process validation, equipment qualification, and cleaning validation. Candidates must have a thorough understanding of FDA regulations and pertinent state and Federal laws. Direct the preparation, documentation and execution of FDA protocols, review all regulatory materials to guarantee accuracy, timeliness and compliance with regulatory standards. Communicate regulatory information to all departments and ensure that information is interpreted and applied correctly. Maintain current knowledge of relevant regulations; provide responses to regulatory agencies regarding product information or issues. Must be willing to work long hours even under extreme work pressures. The ideal candidate must have excellent verbal and communication, organizational and managerial skills. BS degree required. Masters Degree in management or business administration preferred. If qualified, please forward resume to jobs@fote.com.
